

KAT HERNANDEZ

Software Engineer

+63 917 683 6422 • hernandez.kkm@gmail.com • linkedin.com/in/katkmh

Skills

code / Typescript, Javascript, Java, PHP, Python
database / PostgreSQL, MySQL
frameworks & tools / Angular, Protractor, Git, AWS, Phabricator

Experience

- Synacy Inc.

Senior Software Engineer / Jun 2025 - Present

Sept 2023
- Present

 - Set up a Hubspot cache in **S3** using a **Lambda** function hooked to a Hubspot automation.
 - Integrated **Sentry** alerts to our **ECS** tasks and Lambda functions to aid on-call support.
 - Spearheaded loading legacy data from Podio to our internal service. This includes verifying and organizing data according to the latest business rules.
 - **Dockerized** an app that supports sales information systems. It is a service that loads data into S3, and is used with **Athena** and **QuickSight** for visualization.
 - Maintained existing **Make** automations that synced data to **Airtable**.

Software Engineer / Sept 2023 - May 2025

 - Set up foundational deployment code for a new app using **AWS CDK**.
 - Built initial **n8n** workflow for syncing data from internal tools to **Podio**.
 - Integrated Mapbox to our Slack Bot to show location query results visually.
 - Refactored legacy code to better define production and staging configuration.
 - Facilitated an **Agile** learning session with interns.
- Freelancer.com Philippines, Inc

Software Engineer

May 2021
- Sep 2023

 - Took charge of the domain migration after acquiring Loadshift.
 - Created an internal QMS used by operation agents in managing different jobs posted.
 - Implemented saved filters for the browse page using percolate queries in **ElasticSearch**.
 - Applied an alternative implementation to the existing use of **Google Maps web services** that reduced costs by around \$2,000 AUD a month.
 - Conceptualized a driving mode AI chat assistant feature using **OpenAI**.
 - Kicked off writing UI tests for the project using **Protractor**.
- University of the Philippines Diliman

Frontend Web Developer

Oct 2019
- Jun 2021

 - Worked on the Land User and Zoning Information System R&D under UP Training Center of Applied Geodesy and Photogrammetry.
 - Designed and implemented the interface of the web application using **Django** and **Bootstrap 3** that are used in **GeoNode**.
 - Developed filtering and visualization of DHSUD housing projects data with geospatial information using **jQuery** and **MapStore**.
- Ivant Technologies & Business Solutions, Inc.

Intern

Jun 2019
- Jul 2019

 - Provided maintenance to their Android QMS application by adding edit and delete functionalities for queue sessions.
 - Implemented free and subscription perks on the application.

Education

University of the Philippines Diliman 2015 - 2020
BS Computer Science
